DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Arnold et al. 4,402,176.

Arnold et al. discloses a baler including:

- A first upright section (remainder of baler that is not subframe 40)
- A second upright section (40)
- A first linkage (62)
- A second linkage (connection at roller 36)
- A cylinder structure (42)

The first linkage is above the second linkage. In the closed position, the upper portions of the frame sections generally abut (Fig. 2, right side of baler). In the open position, the second frame section is over the upper portion of the first frame section (Fig. 6).

Allowable Subject Matter

3. Claims 2-10 and 12-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3671

4. Claims 14-20 are allowed.
